

POLYGEYSER SKIDS

Save Time and Hassle, Buy Prebuilt!

Start your system quickly and easily with a prefabricated AST Skid. Skids include all the necessary filtration equipment and only need to be hooked up to a tank or pond. Pre-filtration, the filter, UV sterilizer, and a water pump are standard with any AST skid system.

PG 6000 Skid with UV

Professionally plumbed system includes proper valve configurations for adjusting flow or redirecting flow for backwashes. Unions are installed for easy maintenance of equipment, saving you from headaches. Upgrades are available ranging from automated controllers and valves, more powerful UVs, protein skimmers, saltwater pump, and higher head pumps.

PolyGeyser Benefits:

- Automatic backwashing – these filters clean themselves
- PolyGeyser has been tested and proven for over 20 years
- Optional Airlift offers additional energy savings
- Superior biological filtration with 1.5x Bubble Beads
- The biofilm remains protected from frequent backwash cycles
- Simple design has no moving parts to break
- Water loss is reduced – only concentrated sludge is removed

SKID BENEFITS:

- **Professionally plumbed** with easy access unions for maintenance
- **Compact footprint** providing biological and mechanical filtration
- **UV Sterilizer** included (standard) for pathogen and algae control
- **Easily installed** or moved with quick connect fittings
- **Rugged fiberglass pallet** with clearance for pallet jack

Skid dimensions may vary. Upgraded equipment can change the footprint.

SKID NAME	Footprint (in)	Filter Model*	Standard Skid UV	Koi Pond Sizing (gallons)	Lobster Holding (gallons)	RAS Growout (gallons)
PG6SKIDSYS	36" x 51" x 51"	3 cubic foot PolyGeyser	40W	6000	900	1200
PG12SKIDSYS	36" x 57" x 57"	6 cubic foot PolyGeyser	80W	12000	1800	2400

*cubic feet indicates amount of media in filter

For more detailed information on sizing and applications, consult the filter model's Specifications and Sizing Charts.
